

NIKHIL VIJAY BHAVAR

nikhilbhavar1102@gmail.com +91-9834716264 Pune, Maharashtra LinkedIn Portfolio

PROFESSIONAL SUMMARY

Enthusiastic and motivated B.E. Information Technology student with a strong foundation in AI/ML. Experienced in building AI-powered systems, backend development, and full-stack web applications. Passionate about applied AI/ML and developing efficient systems that solve meaningful problems.

PROFESSIONAL EXPERIENCE

AI/ML Engineer Intern

Jun 2026 – Aug 2026

BITS Pilani, Hyderabad Campus

- Researching adaptive multi-signal early exit mechanisms for image recognition models to reduce computation without compromising prediction accuracy.
- Conducting model experimentation and evaluation to optimize inference efficiency in deep learning pipelines.

AI/ML Engineer Intern

Jun 2026 – Aug 2026

Unified Mentor Pvt. Ltd., Gurugram, Haryana

- Built ML pipelines for anomaly detection in 6G smart manufacturing and care transition outcome analytics for a U.S. federal programme.
- Developed interactive Streamlit/Plotly dashboards for real-time machine risk monitoring, maintenance alerts, and process insights.

Python Developer Intern

Jun 2025 – Aug 2025

Rapid Rescue Care, Pune

- Built and maintained backend modules in Python; integrated REST APIs and developed data processing pipelines.
- Debugged and optimised existing system components, collaborating with the team to improve overall performance.

EDUCATION

B.E. in Information Technology

2026 – 2029

Sinhgad College of Engineering, Pune

Diploma in Computer Engineering

2023-2026

Cusrow Wadia Institute of Technology, Pune · Percentage: 90.61%

Class X

2022-2023

Swami Vivekanand English School, Pune · Percentage: 88.20%

SKILLS & COMPETENCIES

Technical: Python, Java, C, C++, JavaScript, PHP, VB.NET, HTML, CSS, JS, Git & GitHub, WordPress, PostgreSQL, SQL, Firebase, FastAPI

Soft Skills: Problem-solving ability, Logical thinking, Team Collaboration, Communication skills, Leadership & Responsibility, Adaptability

Languages: English, Hindi, Marathi

Certifications: Artificial Intelligence & Machine Learning, Learning Python, Backend Web Development (Node.js & JavaScript), Data Structures & Algorithms (C++)

PROJECTS

AI Predictive Maintenance & Management System

Python, Machine Learning, IoT, FastAPI

Engineered an AI system for real-time machine health monitoring and failure prediction. Developed a low-cost predictive maintenance system using IoT sensor data and a Random Forest model, with real-time monitoring and AI-assisted explanations.

Smart Image Analyzer

Python, REST API, BLIP, CLIP

Developed an AI-powered image analysis system capable of identifying and generating detailed descriptions of objects from images. Integrated multiple AI models for enhanced contextual understanding. Applied REST API architecture for scalable backend communication.

Tourism Management System

Python, FastAPI, HTML, CSS, JS

Built a web-based tourism platform where users can upload an image or enter a location name to get detailed information. Integrated map functionality and distance calculation features. Implemented trip cost estimation system for better travel planning.

HONOURS & ACHIEVEMENTS

- **Research paper publication:**

Published research work based on the [AI-Driven Predictive Maintenance Framework](#) developed as the diploma final-year project.

- **Hackathons:**

Participated in Ignisia 2025 (MIT-WPU) and Quantexera 2026 (YBIT Sawantwadi), both national-level 24-hour hackathons.
